Liz,

Perhaps. We'll need additional analysis from the City's Economic Workforce Development Department (EWDD). Sign up for the notifications for the Council File...you'll receive e-mails with updates.

This could be a powerful tool to address economic development, housing and infrastructure needs in many communities. We recognized that, and introduced the Motion soon after AB2 was signed by the Governor.

After initial study, we know that Watts and Wilmington's east industrial areas will qualify. We'll work with City staff to look further into opportunities in San Pedro, Harbor City and Harbor Gateway. We'll be meeting in the next few weeks.

That's just to determine eligibility. The next steps would include conversations and support from the County. Extensive and expensive studies (\$500K +) to provide the technical environmental and financial data needed to establish a CRIA....easily 18-24 months.

Thanks, David, very informative matrix. Do you think that the 90731 zip code has any sections that meet the criteria of 80% of the area has less than 80% of the state median income? Is that something that would take a while to find out?
